

Viking Engineering (Architectural Metalwork) Ltd

Environmental Policy

Viking Engineering is committed to conducting business in a manner which will not affect the quality of life of future generations. As part of our ongoing commitment to the environment, this policy will be reviewed and updated annually.

Viking Engineering will comply with all current legislation governing the protection and enhancement of the environment. In particular it is our aim to:

- i) Carefully consider the selection of building materials, always looking to avoid using anything which has a deleterious effect on the environment;
- ii) Consider environmental issues alongside those of quality, price and other purchasing criteria;
- iii) Prevent pollution arising from activities carried out on site and at our factory with particular emphasis on the correct disposal of waste products;
- iv) Increase the environmental awareness of all that work for Viking Engineering, including sub-contractors;
- v) Communicate our environmental policy and performance to increase the awareness of our suppliers and sub-contractors and to demonstrate the effectiveness of our environmental management approach.
